See More, Experience More with

SuperWin Sliding Windows

Make the transition between the comfort of your home, and the beauty of the nature outside seamless, with our sliding windows, offering good sound insulation, and approximately 50% opening.

Key Features

- **Highly Functional:** Horizontal sliding sashes, in the form of panels.
- **Effortlessly Smooth:** Slides open smoothly for easy access and appropriate ventilation.
- **Up to 50 to 60% Open Space:** Maximise your connection to the outdoors.
- **Soundproof Haven:** Surround yourself with peace with up to 55% noise reduction with the appropriate glass.

Classic Style Meets Modern Functionality with

Casement-Windows Awning

Access the outside world with ease, and make the process of window cleaning effortless with our casement windows, which offer 100% opening and approximately 80-85% sound insulation with the appropriate glass.

Key Features

- **Highly Functional:** Sashes open horizontally.
- **Effortlessly Smooth:** 100% opening of the windows allows for effortless cleaning of both, the glass, and the exterior of the window.
- **Superior Soundproofing:** Approximately 80-85% noise reduction with the appropriate glass creates a tranquil atmosphere.
- **Unrestricted Views:** Bathe your home with the glow of natural light, and glimpse the expansive views.

Doors

Built to Last, Designed to Impress

Perfect For

- **Aesthetic Appeal:** SuperWin doors come in a wide range of styles to complement any and every architectural design.
- **Durability:** With the intention of lasting a lifetime, SuperWin has doors that offer maximum wind resistance and longevity.
- **Weather Resistant:** Designed in a way to withstand the natural elements, the doors provide maximum water tightness.
- **Thermal Insulation:** Improved energy efficiency that blends with comfort, with SuperWin's thermally insulated doors.
- **Noise Insulation:** SuperWin doors offer high acoustic insulation, that reduces unwanted noise.
- **Wind Resistance:** SuperWin doors offer maximum protection against natural elements.
- **Longevity:** The doors are built to last and can blend in with any architectural design.
- **High Acoustic Insulation:** The doors have superior soundproofing, ensuring a calm and peaceful environment.

- **Minimal Maintenance:** The doors are easy to maintain and ensure smooth upkeep.
- **Fire Retardant:** The protection against fire results in enhanced safety in certain situations.
- **Water Tightness:** Offers maximum protection against leaks, making the monsoon an easy season to maneuver.
- **Customization:** Each design specifically tailored to your needs, to fit the vibe of your house.
- **Impact & UV Resistance:** Protects you against the harsh sunlight, and is robust and durable.
- **Energy Efficient:** The doors are built with materials that are eco-friendly and lead-free.
- **Pest-free:** The materials used ensure that there are no pest infestation and there are no borer and termites.

Advanced Conceptual Door Systems

Perfect For

- Creating stunning, barrier-free access points with wide openings and panoramic views.
- Homes, offices and any space seeking a modern, open feel.

Tilt & Turn Window/Door System

Key Features

- **Dual Functionality – Turn and Tilt:** Can swing inward in the turn position for ample fresh air and easy cleaning. Can also open inwards at the top for controlled ventilation.
- **Activated by a lever controlling all mechanics within the frame:** Provides ample fresh air in the room, and facilitates cleaning the window.

Lift and Slide Door System

Key Features

- **Handles Heavy Sashes:** Supports doors up to 6 square meters and 350 kgs in weight.
- **Effortless Gliding:** The installations of special rollers ensure smooth movement despite the heavy weight.
- Offers **barrier-free access** to terraces, gardens, courtyards, conference rooms, wherever needed and can also be used as room dividers.
- **Space saving opening** of balcony doors with Lift & Slide sashes permits optimum use of space, as no sashes project into the room as compared to Bi-fold door systems.

Bi-Fold Door System

Key Features

- **Wide Opening:** Creates an opening that is equal to the space of the door frame.
- **Unrestricted Access:** Offers unrestricted access and brings the vibe of the outside environment into the house.
- **Versatile Use:** Suitable for terraces, gardens, and conference rooms with options for inward and outward openings, making the use as easy as it comes.
- **Foldable Panels:** Create extensive openings, blurring the lines between indoors and outdoors.

Where Vision Meets Innovation with Architectural Windows

Perfect For

- **Unleash Your Architectural Vision:** Go beyond the ordinary with a variety of stunning window styles that help you personalize your dream home.
- **Embrace Natural Light:** Enhance the grandeur of your living space with windows designed to maximise natural light and create a warm and inviting atmosphere.

Bay Windows

Key Features

- **Architectural Variety:** Available in half square, semi-hexagonal, semi-octagonal, or semi-circular shapes with angles of 90°, 135°, or 150°.
- **Project outward for panoramic views:** Glimpse, and enjoy expansive vistas and an increased sense of space.

Top Hung Windows

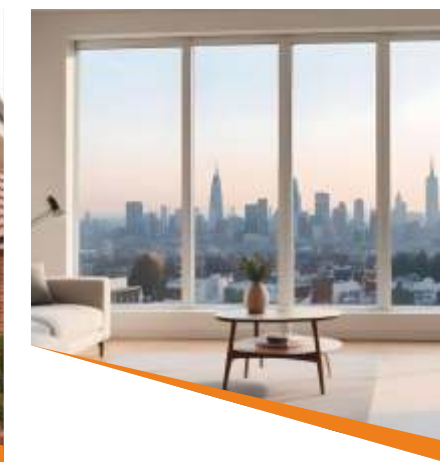

Key Features

- **Effortless Ventilation & Cleaning:** Easy to open from the bottom for controlled ventilation and cleaning.

Arch Windows with Georgian Bars

Key Features

- **Add a touch of timeless elegance:** Create a classic look reminiscent of traditional architecture.
- **Grid Design Options:** Personalize your windows with a beautiful grid pattern in square or rectangular shape.

Fixed Windows

Key Features

- **Uninterrupted Views:** Ensures maximised natural light, and helps you enjoy expansive, unobstructed views, that bathe your home in natural light.

Ventilation Windows

Key Features

- **Optimal Placement:** Placed high on walls for natural light and air circulation.
- **Privacy & Protection:** Ensures no water seepage inside the house.

Enhanced Protection with Grill & Mesh Options

Perfect For

- **Enjoy Nature, Worry-Free:** Complete your windows with advanced protection, that provides respite from unwanted insects and pests, and only the cleanest and freshest air enters your house.
- SuperWin offers a variety of glazing options to optimize your window performance and aesthetics.

Pleated Flymesh

Key Features

- **Ideal:** This set of pleated flymesh is ideal for casement windows.
- **Functionality:** Restricts entry of insects while allowing airflow to enter the house.
- **Design:** Sleek, easy to operate pleated design, that ensures smooth operations.

Grill Between Glasses

Key Features

- **Material:** Solid bars or custom designs, that elevate the overall aesthetics of your place.
- **Placement:** The grills are integrated between two panes of glass in uPVC shutters.
- **Benefit:** These grills provide extra security without compromising aesthetics.

Fixed Grill in uPVC

Key Features

- **Material:** Solid bars of mild steel (MS) are used to ensure strength and longevity.
- **Frame:** Integrated within a durable uPVC frame, to give a chic and clean look.
- **Benefit:** The perfect combination of strength and durability with a clean, modern look.

Effortless Light & Privacy Control with Integrated Blinds

Perfect For

- **Effortless Style & Convenient:** Experience the ultimate product in convenience and style with our innovative integrated blinds.
- **Enhanced Privacy & Light Control:** Manage light and privacy seamlessly with blinds that are conveniently located between the glass panes.

Honeycomb Blinds

Key Features

- **Design:** Hermetically sealed between two panes of glass, ensuring that the aesthetics are maintained.
- **Operations:** The windows are controlled by magnetic bars for easy adjustment.
- **Options:** The windows are available in both, manual and automatic operations.
- **Benefits:** Enhances insulation and privacy while blending sleekness with modernity.

Venetian Blinds

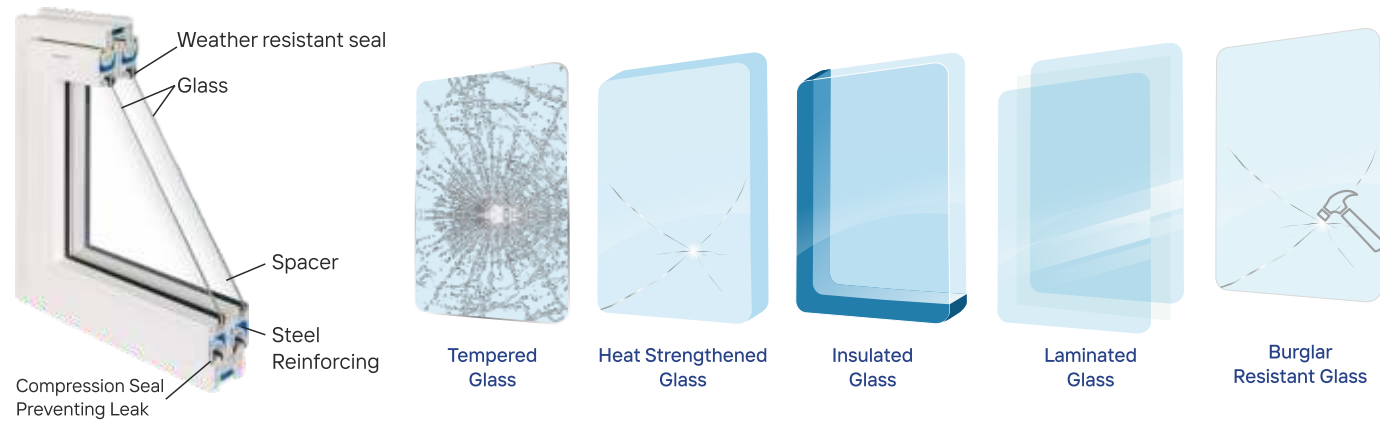

Key Features

- **Material:** High-quality aluminium blinds are used for a clean and sophisticated look.
- **Design:** Sealed between two panes of glass for an aesthetic look.
- **Operation:** The windows come in two operating methods, manual and automatic, ensuring ease of use.
- **Benefits:** Provides the option of adjusting the light, and also controlling it, and maintain privacy with a contemporary style.

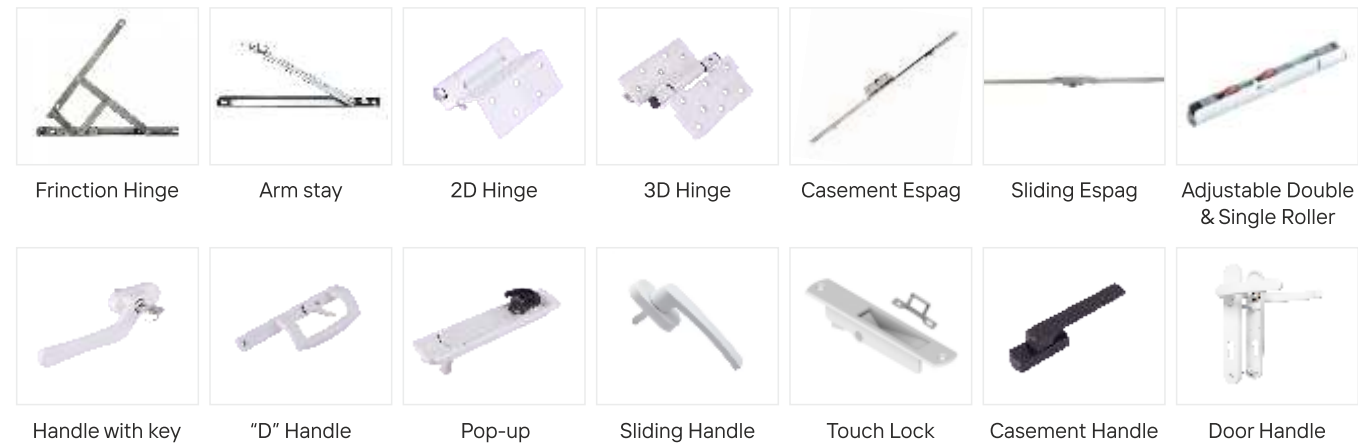

Advanced Glazing Options

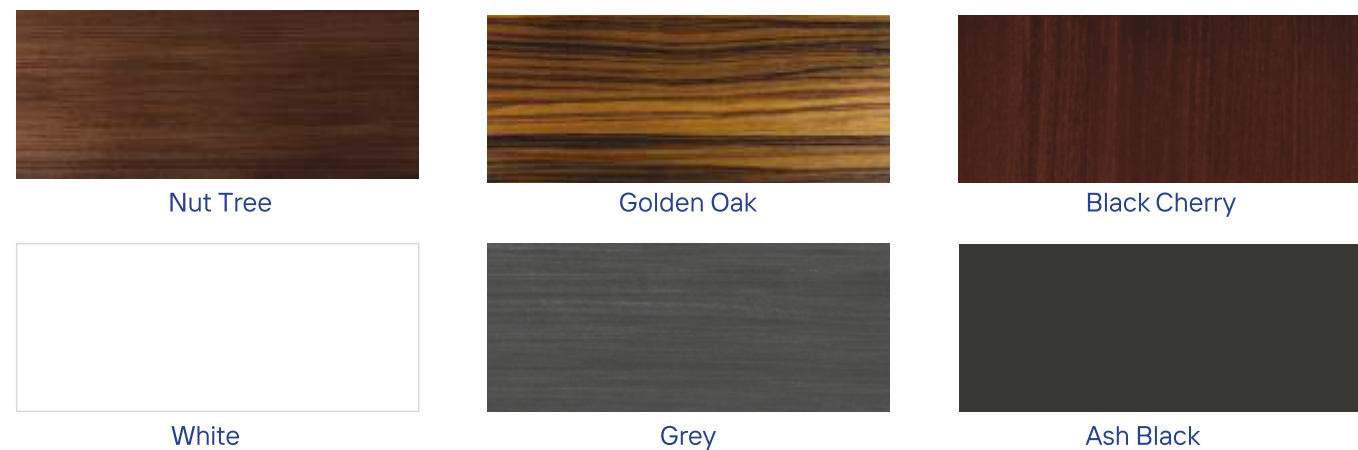

- DGU Glass: Double Glazed Units for superior insulation.
- PVB/Laminated Glass: Combines PVB interlayer with laminated glass for extra strength.
- Laminated DGU: Double glazed with laminated layers for maximum security and insulation.
- TGU Glass: Triple Glazed Units for optimal energy efficiency.
